

Job Specification

For: Lecturer Civil Engineering

Ref: VR/01352

Job Description

Chatham, Kent

Salary: £47K-£55K + Excellent Benefits

Unique opportunity for a Civil Engineer to teach at a prestigious training facility in Chatham, Kent.

This is an extremely rewarding teaching environment that enjoys the benefits of highly motivated and disciplined students, excellent opportunities for professional development, great salary and benefits.

If you are interested in moving into teaching, with a passion to pass your expertise on to others, or already a motivated civil engineering construction teacher, looking for the right career move, then this may be of interest.

£47K - £54K plus excellent benefits including private healthcare, pension, 30 days' holiday (plus bank holidays), mental health and wellbeing support, on-going professional development, cycle to work scheme, onsite gym and cafes and more.

This is an exciting opportunity to join a company with an ambitious vision: *To be the UK's premier skills development partner, harnessing innovative solutions to equip their clients for the future.* The company is passionate about the success they deliver for their learners, partners, and local communities, empowering people to be ambitious, solution-focused, proactive, and creative thinkers. Their values, Commitment to learner success, Investment in People, Collaboration through partnership to achieve shared goals, Innovation to prepare for tomorrow, help them achieve their vision, to be the UK's most innovative training design and delivery partner, trusted by their customers to prepare them for tomorrow. They have a long and very successful partnership contract based at the Royal School of Military Engineering, Brompton Barracks.

Additional experience / capability to support your role as Lecturer Civil Engineering:

- Degree level qualification in civil engineering (or closely related subject)
- Teaching qualification level 5 (or committed to achieving one through funded support with MKC Training)
- Knowledge of construction industry / civil engineering either through industry experience or industry-based research
- Expertise in structures, construction methods, design, materials, BIM, hydraulics, geotechnics or highways
- Understanding of Health & Safety in construction
- Knowledge of sustainable construction methods
